Contents

Volume 60 Numbers 1–2

SPECIAL ISSUE
The Sixth European Vacuum Conference
7–10 December 1999, Villeurbanne, France

AUTHORS		ARTICLES
	1	Editorial
Y Saito, G Horikoshi, R Takahashi and M Fukushima	3	Operational status of the vacuum system of the 300 m gravitational wave laser interferometer, TAMA300
V Brisson, J Hoang, G Lissilour, P Marin, A Reboux, M Bernardini and A Pasqualetti	9	Ultra-high vacuum qualification of the prototype module for the 2×3 km arms of the VIRGO interferometer
V V Anashin, O B Malyshev, I R Collins and O Gröbner	15	Photon-stimulated desorption and the effect of cracking of condensed molecules in a cryogenic vacuum system
O Gröbner	25	Overview of the LHC vacuum system
A E Prodromides, C Scheuerlein and M Taborelli	35	Lowering the activation temperature of TiZrV non-evaporable getter films
G Moulard, B Jenninger and Y Saito	43	Industrial surfaces behaviour related to the adsorption and desorption of hydrogen at cryogenic temperature
K Zapfe	51	The vacuum system for the superconducting linac of the TESLA test facility
C Benvenuti, P Chiggiato, P Costa Pinto, A Escudeiro Santana, T Hedley, A Mongelluzzo, V Ruzinov and I Wevers	57	Vacuum properties of TiZrV non-evaporable getter films
P Chiggiato and R Kersevan	67	Synchrotron radiation-induced desorption from a NEG-coated vacuum chamber
O Boulon and R Mathes	73	Flow modelling of a Holweck pump stage in the viscous regime
N Hadacek, J P Périn and F Viargues	85	Pressure drop for a rarefied-gas flow through a tube with a thermal gradient at low temperature
S Amorosi, M Anderle, C Benvenuti, S Calatroni, J Carver, P Chiggiato, H Neupert and W Vollenberg	89	Study of the discharge gas trapping during thin-film growth
R Kersevan	95	Vacuum system of the ESRF: operational experience and status report

PII: S0042-207X(01)00107-5

J Miertusova	101	Elettra vacuum system: status and experience with the new Al vacuum chambers
N Green, S Bryan, H Jensen, J Orchard, R Pearce and S Scales	107	Design and application of secondary pumping containments for leak testing welds at JET
C Herbeaux, P Marin, P Rommeluère, V Baglin and O Gröbner	113	Photon stimulated desorption of unbaked stainless-steel vacuum chambers
D Schmied	123	Vacuum control and operation of the ESRF accelerator system
R Davis, C De La Parra, H C Hseuh, P Mickaliger and D J Pate	131	Measurement of helium leak rates with temperature and pressure in RHIC
R Pearce, J Bruce, S Bryan, N Green, J Orchard and S Scales	137	Vacuum integrity and protection systems at JET
C Grisolia, J Bucalossi, T Loarer, S Vartanian, A Grosman and G Martin	147	Conditioning procedures in Tokamak: Tore Supra application
M Bergoglio and A Calcatelli	153	Some considerations on handling the calibration results of capacitance membrane gauges
T Bisschops and J Vijfvinkel	161	Large ultra-precision motion feedthrough designs
M Tosa, K Sub Lee, A Kasahara and K Yoshihara	167	Super clean substrate transport by extreme high vacuum integrated process with levitation transfer systems
L Koller, M Bizjak and B Praček	175	Cleaning of thin passivation layers on Ag contact material by vacuum outgassing
C Carabetian, P Salvetat, C Nicolas, G Michaux, M Lefebvre, C Tamiatto, S Francois and R Jeannette	179	In-vacuum calibration of space instruments in Institut d'Astrophysique Spatiale — Orsay (France)
J C Billy, J P Bojon, B Henrist, N Hilleret, M J Jimenez, I Laugier and P Strubin	183	The pressure and gas composition evolution during the operation of the LEP accelerator at 100 GeV
Chr Edelmann, St Wilfert and R Kauert	191	Vacuum gauges using elastic collisions between slow electrons and gas molecules
T Sonoda, A Watazu, J Zhu, A Kamiya, K Ushiki, K Naganuma and M Kato	197	A surface cleaning method for sputter deposition of pure titanium film onto TiNi shape memory alloy substrate
P Řepa, L Peksa and P Závoda	201	Determination of the pressure and the released gas flow in a chamber connected through a small conductance with the chamber equipped with gauges
A Horbowa and Ph Szott	207	Vacuum cryopump systems supplied by cryogenerators and using heatpipes for heat transfer
J A Bhatti, M K Aijazi and A Q Khan	213	Design characteristics of molecular drag pumps
V Brisson, C Garnier, P Marin and A Reboux	221	Large ultra-high-vacuum VAT gate valve with viton gasket for the VIRGO interferometer
R. Hrach and V. Hrachová	229	Self-consistent particle modelling of plasma-solid interaction: influence of negative ions
S Michizono and Y Saito	235	Surface discharge and surface potential on alumina rf windows

P J van der Zaag, S Lefeuvre and T Bisschops	241	Hysteresis in the hopping current of secondary electrons over MgO: the role of CO_2 and surface cleanness
H Águas, R Martins and E Fortunato	247	Role of ion bombardment on the properties of a-Si : H films
V V Anashin, I R Collins, R V Dostovalov, N V Fedorov, O Gröbner, A A Krasnov, O B Malyshev and E E Pyata	255	Magnetic and electric field effects on the photoelectron emission from prototype LHC beam screen material
R Gobin, P-Y Beauvais, R Ferdinand, J M Lagniel, P Ausset, B Monsanglant, B. Pottin and N. Rouvière	261	SILHI proton beam (80 mA–95 keV) characteristics as a function of the beam line atmosphere at CEA/saclay
M Seidel, J Kouptsidis, G Nawrath, U Schneekloth and K Zapfe	267	The vacuum system for the upgraded HERA interaction regions
S Amorosi, C Benvenuti, P Chiggiato and M Malabaila	275	Experimental evaluation of Niobium film pinholes
C Benvenuti, A Escudeiro Santana and V Ruzinov	279	Ultimate pressures achieved in TiZrV sputter-coated vacuum chambers

Volume 60 Number 3

AUTHORS		ARTICLES
R Khalfaoui, M Zilabdi, S Behli, C Benazzouz and S Tobbeche	285	A simple method for the deconvolution of Rutherford backscattering spectra
Y-W Chang, R-Y Jou, H-P Cheng and F-Z Chen	291	Pumping performance analyses of a turbo booster pump by direct simulation Monte Carlo method
E Shidoji, K Ness and T Makabe	299	Influence of gas pressure and magnetic field upon dc magnetron discharge
S Mróz and A Krupski	307	Composition of the first two atomic layers in $Au_{0.2}Cu_{0.8}$ and $Au_{0.8}Cu_{0.2}$ alloys
V Kulikovsky, L Shaginyan, L Jastrabik, L Soukup, P Bohac and J Musil	315	Some growth peculiarities of a-C:H films in ECR microwave plasma
M A Hussain	325	Vacuum degasifier: comprehensive modelling and simulation
C J Tavares, L Rebouta, M Andritschky, F Guimarães and A Cavaleiro	339	Mechanical and surface analysis of $Ti_{0.4}Al_{0.6}N$/Mo multilayers
P Fan	347	A stratified flow model for calculating the conductance of long tubes with constant cross section
A H Ammar	355	Some studies on structural and optical properties of $Zn_xCd_{1-x}Se$ thin films
N M Mustapha and R P Howson	361	Reactive filtered arc evaporation
	369	Erratum
	I	VACCUM DIARY

SPECIAL ISSUE

DAE-BRNS Workshop on Thin Film Multilayers

6–8 October 1999, Mumbai, India

	vii	Preface
	ix	Committee Members
AUTHORS		ARTICLES
S Banerjee, A Datta and M K Sanyal	371	Study of thin film multilayers using X-ray reflectivity and scanning probe microscopy
B A Dasannacharya	377	Multilayer growth facilities and studies at IUC-DAEF: a review
G S Lodha, V K Raghuvanshi, M H Modi, P Tripathi, A Verma and R V Nandedkar	385	X-ray multilayer optics: growth and characterization
S Vitta	389	$Ni_{50}Nb_{50}$/C amorphous multilayers for "water window" soft X-rays – structure and stability
M Gupta, A Gupta, S M Chaudhari, D M Phase, V Ganesan, M V Rama Rao, T Shripathi and B A Dasannacharya	395	Microstructural study of iron nitride thin films deposited by ion beam sputtering
A Paul, A Gupta, S M Chaudhari and D M Phase	401	Effect of interface structure correlation on magnetoresistance of Fe/Cr multilayers
S M Chaudhari, S Chaudhary, S B Roy, P Chaddah and B A Dasannacharya	407	DC magnetization studies in Nb/Fe superconducting multilayers
N K Sahoo	411	Multilayer inverse synthesis techniques for the analysis of mixed-mode inhomogeneities in composite and co-deposited dielectric coatings
D Bhattacharyya, N K Sahoo, S Thakur and N C Das	419	Spectroscopic ellipsometry of multilayer dielectric coatings
T Srinivasan, R Muralidharan, S K Mehta, B P Jain, S N Singh, R K Jain and V Kumar	425	Characterisation of molecular beam epitaxy-grown InGaAs multilayer structures using photoluminescence
T Joseph Sahaya Anand, C Sanjeeviraja and M Jayachandran	431	Preparation of layered semiconductor ($MoSe_2$) by electrosynthesis
	III	Volume Contents
